

The Copper Queen Store.

The Wash Goods for SPRING

The prettiest showing of wash goods we've had is now ready

We feel safe in putting it a little stronger; the prettiest showing of wash goods you'll find in this section of Arizona is now ready.

The designers, printers and weavers of sheer cotton goods have fairly outdone themselves this season.

From the best collection of Summer wash stuff we could find, we have selected the very prettiest and choicest patterns--the like of which you will not see in any store, aside from the big cities.

We could mention a list of the names the new stuffs as known by in trade--Swiss silks, soie de plisse, soie this and soie that--but it will give you no idea of their beauty. You'll just have to see each piece, and then you'll not think of their names for their beauty.

Printed dimities--the good, old stand-by dimities--are as much in evidence as ever; and their names are but scant disguise.

Plenty of the little neat effects are to be had; they are always good--but the floral stripes are newer. In fact wide stripes, or floral patterns interspersed with wide stripes of white are shown more than any other effect. It's a quaint, old-fashioned pattern idea revived.

Solid colors with woven dots--some with lace-like insertions--are very popular too. These look for all the world like real silk, and they bear the names beginning with "Soie."

The Batiste and lawns--gingeams and percales--all as fresh and new as Spring itself also await your admiration.

At no time will you find the assortment better than right now.

TOM MOORE

Who has enriched English by the authorship of the Last Rose of Summer and other jewels of like character, struck a true cord when he said:

"AS WE TRAVEL THROUGH LIFE, LET US LIVE BY THE WAY."

Moore possessed one of the most brilliant minds of his century. He recognized the fact that eating and drinking were two of life's greatest pleasures when properly indulged--The

Who Said Shirts?

TAKE a look at ours in the window, then take a look at those inside, then take a shirt or more and don't forget you have to leave the "dough," for FAIR exchange is no robbery. We can show you as well a line of Stiff Shirts, Golfs, Negligee, and also Dress Shirts as you can ask to see, and at prices that make them sell. A. P. SKINNER, Main St.

Pope Leo's Dazzling Celebration at Rome

Rome, March 4.--The pope celebrated the twenty fourth anniversary of his coronation and the jubilee of his pontificate yesterday with great solemnity. The service was the most impressive in years. The Sistine chapel was crowded with cardinals, bishops and other dignitaries of the church, delegates from Catholic organizations in all parts of the world, the Italian and foreign representatives of the religious orders, and thousands of lay spectators. Several hundred Americans were among the present. The bright robes of the cardinals and the gorgeous full dress uniform of the Pontifical Noble Guard gave brilliant coloring to the spectacle. Cardinal Rampolla, as archbishop of St. Peter's, officiated at the celebration of a solemn Te Deum, assisted by numerous cardinals, bishops and inferior clergy. The services culminated in impressive ceremonies attending the presentation of a triple crown to his holiness. The crown is made of gold and encrusted with diamonds and rubies, the cost, \$200,000, having been subscribed by Catholics throughout the world. The formal presentation was made by Cardinal Respighi, the pope's vicar general and president of the international committee for the jubilee services.

During the course of the day the pope received in audience, in the throne room, the missions sent by the sovereigns of Europe who presented to his holiness messages of felicitation. The grounds of the Vatican were crowded with pilgrims throughout the day. During the jubilee services the basilica was open to the public and it was filled in every part. It is estimated that the crowd inside and outside reached a total of not less than 100,000 persons.

Pope Leo XIII. (Vincenzo Gioacchino Pecci) was born at Carpineto, Italy, March 8, 1810, and was elected pope February 20, 1878, after the death of Pope Pius IX., which occurred February 7, 1878. Pope Leo was crowned March 3, 1878.

New York, March 4.--Throughout the country yesterday special services were held in all Catholic churches in celebration of the silver anniversary of Pope Leo's coronation. In St. Patrick's cathedral this morning Archbishop Corrigan officiated in person over the services, which were of an elaborate character. The services concluded with a public recitation of prayers for the pope.

LA CANANEA.

Doings at the Great Copper Camp

The funeral of the late J. Frank Hoffmaster was a thought compelling instance of the active helpfulness of that powerful fraternal order, the I. O. O. F. Hoffmaster, formerly a resident of Bisbee, died here on February 16th, after a brief illness. He was a member of Golden Rule lodge, No. 100, I. O. O. F., of Los Angeles, Cal. Mr. Hunt, representing the members at this place, wired Secretary Emil Marks of Bisbee lodge, No. 10, who verified the membership of the deceased, and the burial occurred the following day under the auspices of the order. The Old Fellows of La Cananea desire to express through the REVIEW their gratitude for the great assistance rendered them during the illness and death of their brother, especially to Scott White, James H. Kirk, C. M. McHenry, John A. Campbell and others of the Cananea Consolidated Mining Company's management. Fortunately Mrs. Hoffmaster arrived here a few days before her husband's death and was able to attend his funeral. During her brief stay in Ronquillo she was the guest of Mrs. John Blewett. Mrs. Hoffmaster returned to Bisbee on the 19th.

In a recent communication your correspondent in mentioning the foreman of the Democratic mine erroneously spoke of him as Mr. Hollis. The correct name is Oslor.

The Oversight mine's efficient management has been supplemented by the addition of James Chandler, who recently became sub-foreman under Frank Pentleton.

Martin Nolan and Martin, Jr., arrived in Cananea a few days ago and accepted positions at the Capote.

Mr. Gerdes, formerly associated with Peter Hansen in the saloon business in Bisbee, is a recent arrival, as is also James Donovan.

O'Brien and Duffy to Clash

Chicago, March 4.--Martin Duffy, the western lightweight champion, and Jack O'Brien, who once gave Frank Erne the toughest kind of a twenty-five-round fight, are to mix things up in a six-round bout before the Acme club tonight. The two fighters are among the best in their class and unless all guesses go astray they will put up a lively battle from the time the gong sounds. The winner will be matched to fight Frank Erne for the champion title.

Forces Gathering at Bogota.

Washington, March 4.--The United States minister at Bogota, Colombia, informs the state department that five thousand seasoned government troops have reinforced those at Bogota. Fighting has been conducted now five days.

Metal Report Strong

Copper 12 1/2, lead \$4.12, silver 66 1/2.

The Etruria Disabled

New York, March 4.--The steamer Etruria which was due at Liverpool last Saturday is reported through the steamer Ottawa to be four hundred miles west of the Azores and in tow by the steamer William Cliff. The Etruria has lost her propeller.

Cincinnati Is 100 Years Old

Cincinnati, O., March 4.--The city of Cincinnati is 100 years old today and it is celebrating the event in various ways. The main feature of the celebration will be the banquet to be held this evening under the auspices of the Chamber of Commerce. Among the invited guests are Senators Hanna and Fowler, the Ohio congressmen and the governors of Ohio, Indiana and Kentucky.

Float the Yellow Flag.

San Francisco, March 4.--The transport Meade which sailed for Manila Saturday returned flying a yellow flag, having smallpox and scarlet fever on board. She anchored and went into quarantine. Eight hundred recruits and passengers were aboard.

Gold Bonanza Tucson Interested

The report of gold discoveries in Sonora are increasing as interest is being directed to the gold fields extending from the Galerias north of Tucson to the central part of the state of Sonora. A new discovery is now reported eight miles northwest from Magdalena, Sonora. The body of ore is very large says the reporter. It is a hill 700 feet long and 350 to 400 feet wide. The entire hill is composed of rotten porphyry quartz, carrying a large percentage of iron, and carrying gold values. There are rich stringers of ore running through this big ore body which Mexicans are digging out and picking away. There are some old workings on the mines 60 feet deep which are all in ore from top to bottom of the shaft. A sample taken from the entire area of ground of 700 feet was made with a view to determining the value of the entire body, which gave \$4.65 per ton. In view of the fact that the ore is treated by the cyanide process this is considered a high average where the body is so large. It is also said that there is abundance of water near the mines and they can be worked at a minimum cost.

The property comprises 52 acres of ground and was purchased during the week by the "La Fiesta de Ore Mining & Milling company." As soon as the property has been examined and reported upon by the parties sent to examine the new find, E. H. Cox of Nogales is president, G. W. Fisher of Tucson, vice-president, F. H. Tolson of Tucson, secretary and treasurer. It is understood the company will make Tucson headquarters and commence development and the equipment of the mines at once.

From all that can be learned from those who have seen this property it is very large and is said to be much richer than is claimed for it.--Tucson Star.

Most Formidable Fleet

Washington, March 4.--The battleships Kearsarge, Alabama, Massachusetts and Indiana, left Cuba yesterday for Colombia. It is the most powerful American fleet ever in the Gulf. It is expected to have a quieting effect upon the revolution.

Attention Elks!

All members of Bisbee Lodge, No. 671, B. P. O. E., and visiting brothers are requested to meet at Elks rooms in opera house today at 12 o'clock to attend the funeral ceremonies of Brother J. J. Parks, at request of Globe lodge, No. 489, B. P. O. E. C. F. Nichols, E. R. Wm. Mackay, Secretary.

Cooperage Trust.

Detroit, March 4.--A cooperage trust embracing three-quarters of the stave and hoop manufacturers of the country is to be launched at a meeting to be held in Detroit today. The initial steps looking to the formation of the combination were taken at a conference held two weeks ago. The company will be called the Central Cooperage Sales company and its headquarters will be in Buffalo. Its capital will be \$500,000. Leading manufacturers of Ohio, Michigan, Illinois and Canada are the promoters of the movement. The announced purpose of the combine is to advance prices, reduce freight rates, prevent unjust claims, and stop ruinous price fluctuations.

Thousands of Miners Out of Work

Telluride, Colo., March 4.--The blizzard which has raged four days has ended and this morning the weather broke bright and clear. One hundred and fifty men are at work on the slides, under which scores of bodies are buried. Work is progressing very slowly. The rescue cannot reach the point where the bodies lie until tomorrow. A big mine stricken district is closed down for fear of further disaster. Thousands of men are consequently out of work.

Prince Henry in Chicago

Chicago, March 4.--Prince Henry was greeted by Mayor Harrison and drove around the city and visited the mercantile institutions. His stay will be four days.

Philippine Tariff Bill

Washington, March 4.--The house today adopted the Philippine tariff bill which now becomes a law. The chief provision is a reduction for the Philippine products of 25 per cent on existing duties.

Floods Cause Awful Disaster

New York, March 4.--Dispatches from Wilkesbarre, Pa., show more than a score of lives lost and five million dollars worth of property is destroyed by the fearful floods in northeastern Pennsylvania. There are eighteen thousand and homeless persons in Wyoming valley. Danville was over half inundated and the railroad tracks are submerged. Water receded at Patterson, N. J., but the danger practically is over. One life is reported lost. Loss estimated at five hundred thousand dollars.

Dewet Wounded

London, March 4.--A South Africa dispatch reports that General Dewet had been shot through the arm in a recent round upon the Natal frontier.

In Interest of Hampton Institute

New York, March 4.--A big meeting is to be held in Carnegie Music Hall tonight in the interest of Hampton and Tuskegee industrial schools. Addresses are to be delivered by Booker T. Washington, president of Tuskegee institute; Edwin A. Alderman, president of Tulane university, and Robert Ogden, president of the Southern Education Association.

Cattle Growers Petition

Denver, March 4.--The American cattle growers convention here today passed a strong resolution to be presented to President Roosevelt begging him to stay further proceedings in the interior department that now or may be directed toward the removal of fences in the public domain.

Iowa Senators Take Oath

Washington, March 4.--Credentials for Senators Allison and Dolliver, of Iowa, who were recently re-elected were presented today. The oath was administered.

Will Repeal War Tax.

Washington, March 4.--The drift of conversation in the senate committee on finance today indicated that the house bill to repeal all war taxes will be passed without change.

GOVERNOR OF SOUTH CAROLINA

Plain Spoken About the Tillman-McLaurin Encounter

A dispatch from Columbia, South Carolina, says, Governor McSweeney thinks he voices the sentiment of South Carolinians when he wishes that he had accepted the resignation of Tillman and McLaurin when they were tendered, and also when he intimates that expulsion by the senate would be a satisfactory thing now.

Governor Sweeney said: "This comes at a time, just when our state is on the crest of the wave of industrial development and a state of quietude is prevailing, to the material benefit of the citizenship. That this affair in the senate will act as a setback I do not doubt."

"It is for the United States Senate to deal with the senators implicated as that body sees fit under its rules. If the senate exercises its full powers and the case comes to me as Governor of South Carolina, I will deal with it promptly, squarely, firmly and deal with it as circumstances demand."

The governor let it be plainly understood that if the senators were expelled neither of them would be reappointed by him.

THE PARKS FUNERALS

Last Rites to Be Paid the Remains of James Parks and Agnes Parks Today.

The funerals of James J. Parks and Agnes Parks, his wife, will take place today, the former to be buried here at 1 o'clock and the remains of Mrs. Parks to be interred at Naco later in the afternoon. Undertaker G. W. Hubbard has charge of the bodies and the time is so arranged that he may be at both places. The mother of Mrs. Parks, Mrs. Wilson of Globe, has arrived in Naco in response to a telegram sent from that place. Rev. H. Shields will officiate at Naco.

Additional Local

Mrs. Hart entertained at luncheon a number of her friends Monday afternoon at one o'clock, when she served a luncheon in honor of Mrs. Dr. Baum. Those present were Misses Hamner, Paignt, Ferguson, Tomlinson, Baum and Kelly.

W. C. Greene of the Cananea company, with a party of stockholders are expected in Naco the latter part of the present week.

E. J. Jacklin came in Sunday from his ranch in the Sulphur Spring Valley.

E. J. Grtes of the Turkey Track Cattle company, drove up from Naco last evening where he has been on business connected with that concern.

Ben Sneed, the well known San Pedro cattleman was in and states things looking fine up in that section of the country.

W. H. Watson, who recently came to Bisbee and is now in the employ of S. K. Williams as stenographer, has for the past two years been in the employ of Gov. Gage of California. In this capacity he has also been in the employ of the Santa Fe and Southern Pacific railroads. Judge Williams is extremely fortunate in securing so efficient a man as Mr. Watson to look after this department of his business.

The many friends of Jack Marshall, better known as "Slick" in Bisbee, will regret to learn that he was seriously injured in the recent snowslide at Telluride. Marshall was engaged as chief cook at the Silver Belt Boarding house when the slide came and he was caught beneath the timbers of the boarding house and badly crushed, being injured internally. Marshall was a former resident of Bisbee for a number of years and was at one time a proprietor of the New England Kitchen, being associated with Thomas Whitehead. He left Bisbee about a year since, going to Telluride, where he was employed up to the time of his recent accident. His many friends here sincerely hope for his ultimate recovery.

SCHOOL OF CERAMICS

WHERE STUDENTS ARE GIVEN INSTRUCTION IN CLAYWORKING.

An Institution Established by the State of New York in Connection With Alfred University--Furnishes Practical Training in Plastic Art.

It was long ago recognized by the educators of Germany that each industrial calling demanded its own line of technical instruction. Even before the consolidation of the empire in 1871 technical schools abounded, and with the establishment of a central government came greater effort in the same direction, and the provincial schools became tributary to the great centers of industrial training.

Among the arts to which attention was directed that pertaining to clayworking became prominent. The researches of Dr. H. Seger brought to light many deep and perplexing questions. Manufacturers of all kinds of stoneware sought assistance in the solution of their problems, and a vast machine of ceramic education was set in motion.

America with characteristic "push" was the first of English speaking nations to take the matter up. The initiation of the movement was due to the persistent agitation of Professor Edward Orton, Jr., of Columbus, O., who in 1894 succeeded in establishing a ceramic department in the Ohio State university.

The success of the work in Ohio led to a demand for trained clayworkers, and in 1900 the legislature of New York state passed a law establishing a state school of clayworking and ceramics. The provisions of the act of legislature were speedily carried out and the school was established at Alfred, in Allegany county, with Professor Charles F. Binns, M. S. C., as director and in connection with Alfred university, an institution founded in 1826, well equipped with modern appliances and apparatus, to all of which the state school students have full access.

For the work of the school of ceramics a special building was necessary, and a plot of ground was purchased and devoted to the people of the state of New York, upon which has been erect-

NEW YORK STATE SCHOOL OF CERAMICS AT ALFRED, N. Y.

ed a structure at once artistic and well adapted to its purposes. It is 75 by 40 feet and is built of local red brick, with limestone trimmings. The roof is of tile, also made in the locality.

The equipment is very superior and the facilities for research and experiment are unsurpassed, provision being made for every branch of the industry. The main entrance to the building is on the upper side of a slope, so that the basement has an opening upon the level in the rear. On the principal floor are the executive offices, recitation room and library, technical laboratory and a museum. In the laboratory are a series of light machines for grinding purposes and small furnaces for fusion work. Here the many and complex experiments of all branches of the industry are planned and carried out. On the second floor is the art department. Art is many sided as applied to pottery. Every requirement is considered. The planning of machinery and kilns, the design and construction of artistic terra cotta, the shaping and decoration of dishes and the design and elaboration of fine faience and porcelain offer unlimited scope for artistic and mechanical genius.

Beginning with elementary drawing, both free hand and mechanical, the student is led to study the principles of design and eventually become capable of both conception and execution.

Descending to the basement, the visitor is impressed with the number and variety of machines in use. Two gas engines supply the power; one of thirty-six horsepower drives the large machines, and a small one of two horsepower runs the light grinding apparatus. The machinery for brick and tile manufacture comprises a dry pan or crusher, a pug mill or mixer and a brick machine and cutting table. A screw press supplies the means of making repressed brick and dry pressed tile.

The school opened with preliminary work in the fall of 1900, before the completion of the building several students presenting themselves for instruction.

When the school reopened in September, 1901, eighteen students were enrolled, five being young women who desired to study the higher branches of ceramic art. This is considered a highly satisfactory number and gives evidence of the fact that technical education upon these lines is in demand.

Pima County Land Case in Washington

Washington, March 4.--One of the most important land cases came up for hearing before federal Supreme court today affecting the landed interests of Pima county. The case is being argued by some of the ablest lawyers in Arizona -- Judge Ainsworth, Rochester Ford, George Hreon of Tucson, and E. E. Ellenwood of Flagstaff are here.
